

## Chemistry I Final Exam - Announcement

- 15% of your overall grade.
- Final exam will be comprehensive over the entire semester, including the material that we are currently studying.
- Each person will be allowed to have one 8.5" x 11" page of notes. You will also be allowed to use your lab notebook, but **only if** you turn it in by Friday 1/18 for grading.
- If you choose to take the partner final, you will be paired with someone of comparable skill level, determined by your cumulative test average.
- You have the option of taking the test individually. You must notify me by the beginning of class on Friday, 1/18 if you plan to do this. Partners will be announced at this time. If you know you are going to be absent on Friday, 01/18 let me know whether or not you are planning to take the test individually.
- Resources for studying? You have been given practice tests for all 4 units. In addition, there are practice problems at the back of each chapter in the book for additional problems and questions.
